ENTERTAINMENT

# Entertainment Security Assessment

Security testing for film, TV, streaming, music and audio, casino and iGaming, and console and PC games — with AI and post-quantum readiness, and never on live play or unreleased content beyond scope.

## What we assess

### Media & streaming

Vendor apps and content transfer tools, post-production networks, streaming apps, and DRM, licence and CDN back ends.

### Gaming platforms & games

Casino and iGaming platforms, wallets and accounts, game clients, launchers, anti-cheat drivers and economies.

### AI & post-quantum

Voice and likeness models, generation pipelines and AI characters; DRM, signing and payment cryptography.

## What you get

- ✓ Pen testing of the kind the MPA Best Practices describe
- ✓ Streaming back ends tested against studio protection practices
- ✓ Gaming platform testing aligned with GLI-19 B.9 and Michigan scope
- ✓ AI-specific test cases, including cross-client isolation
- ✓ Evidence ready for an assessor, regulator or auditor
- ✓ CBOM and AI-BOM in CycloneDX format
- ✓ One round of retesting to confirm the fixes landed

## How it works

1. Scope content, platforms, and the studio or regulator you answer to
2. Agree test accounts, dummy assets and non-production environments
3. Test apps, platforms, clients and AI hands-on
4. Deliver findings and evidence, then retest the fixes

## A good fit if

- ✓ You are a post-production, VFX, dubbing or localisation vendor working for major studios.
- ✓ You run a streaming service protecting premium or pre-release content.
- ✓ You operate casino, iGaming or sportsbook platforms that need independent assessments.
- ✓ You publish games with accounts, economies, anti-cheat or AI characters to protect.

## Probably not, if

- × You need a TPN assessment or a gaming lab certification — we test; TPN assessors assess and labs certify.
- × You want testing that touches live wagering, matches or players without written agreement.
- × You want console-network or app-store systems tested — those are the platform holder's to authorise.

## How we engage

**Fixed scope**
A fixed-scope proposal at a fixed price. No hourly meter running.

**Senior-led**
The practitioner who scopes the work does the work and writes the report.

**Plain language**
One report your engineers and your board can both act on.

**Retest included**
We verify the fixes landed — one round of retesting is in scope.
